Why Choose Us?

*** First private bulk sms company within Bangladesh who use round robin gateway system.
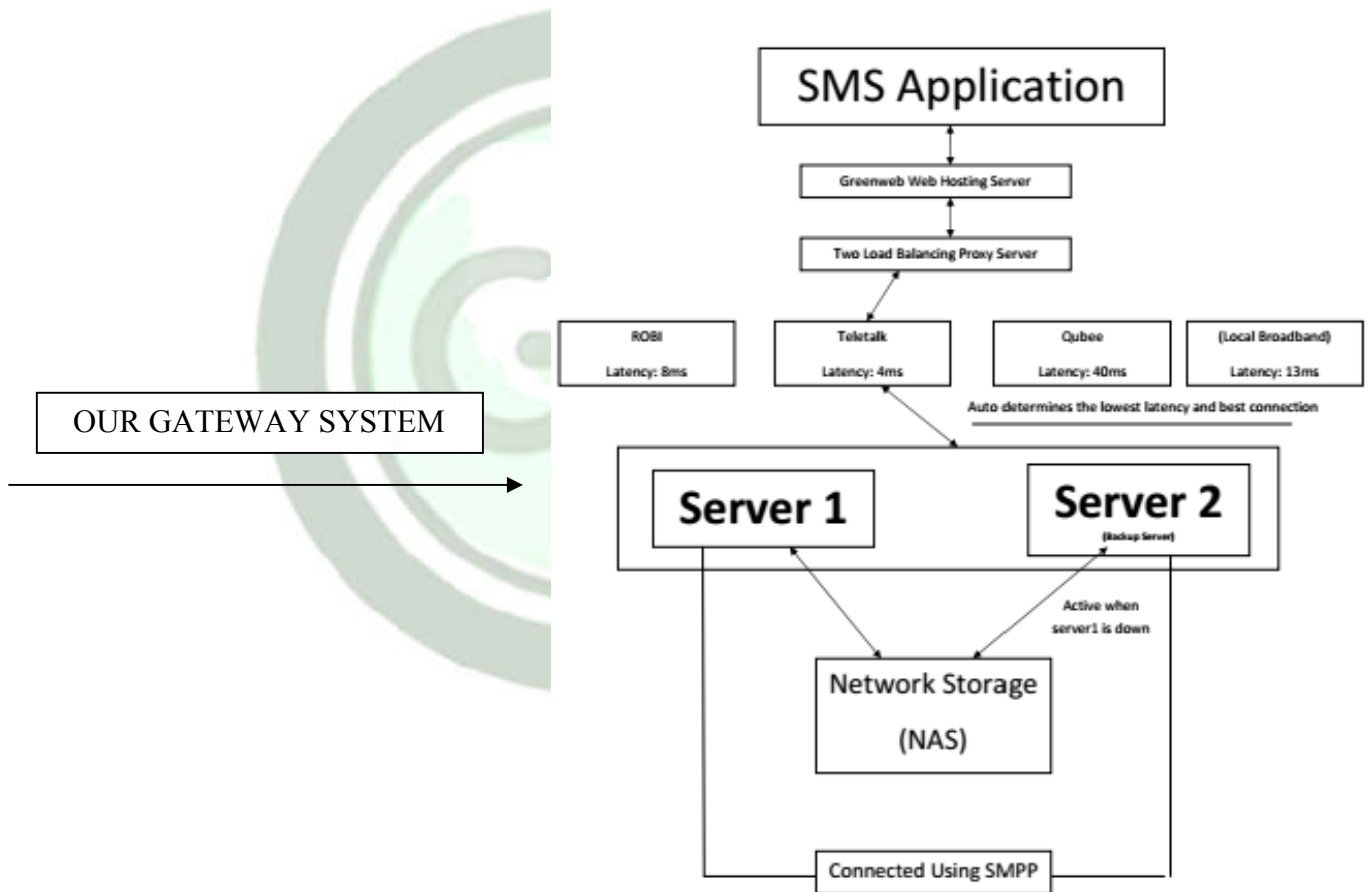

What is round robin system?
If you send SMS using one "fixed number" or from one "Brand Name" the sending speed will be very low, and there is a great possibility of sending failure. But in round robin gateway, SMS send using multiple operators and multiple gateways. Thus if one operator/gateway is unavailable or fail to send your message another operator/gateway try to send it immediately. It also increases the sending speed.

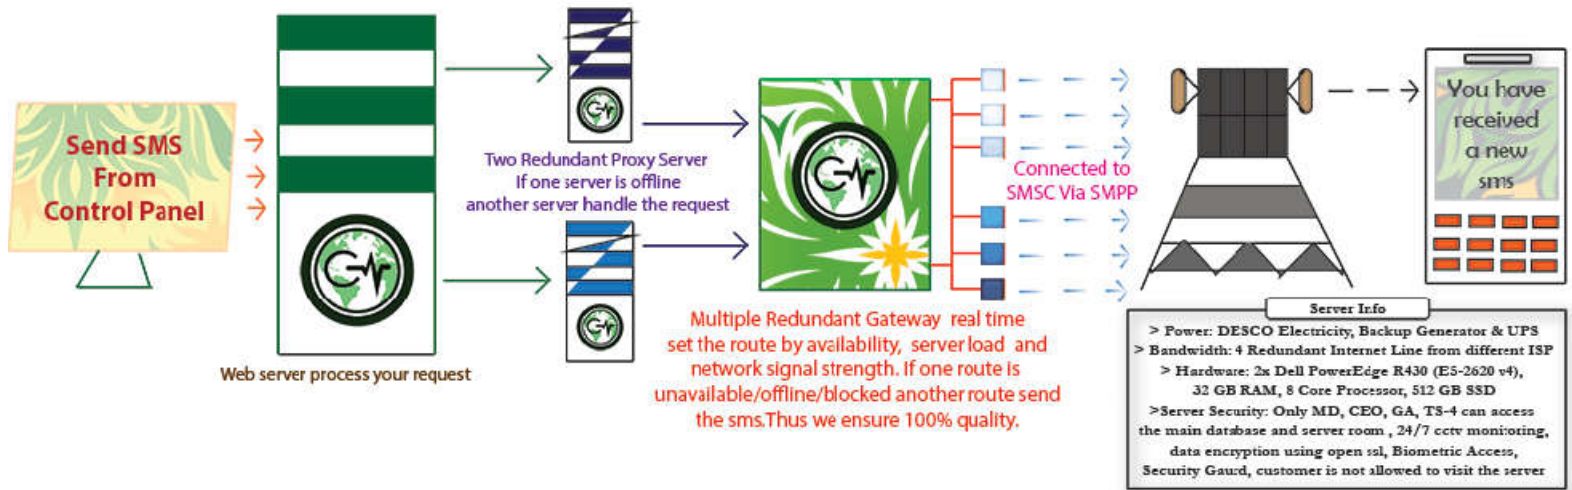

OUR GATEWAY SYSTEM

Suppose, you send 5000 SMS using Brand or One Fixed number and it takes 1000 Seconds to delivery.
But if you use 100 gateway to send that 5000 SMS it will takes only 1000/100 = 10 Seconds to deliver all of your SMS.

WHY CHOOSE US?
1. Speed: We use multiple route to deliver your sms.
2. Reliability: As we use redundant gateway, there is no possibility of sending failure
3. Price: We are not reseller, thus we can offer you the most cheapest price of the industry.
4. Powerful Control Panel: Inbox, inbox forwarding, number importing from excel/text, auto reply, api and easy recharging system

Send SMS From Control Panel

Two Redundant Proxy Server
If one server is offline another server handle the request

Web server process your request

Connected to SMSC Via SMPP

Multiple Redundant Gateway real time set the route by availability, server load and network signal strength. If one route is unavailable/offline/blocked another route send the sms.Thus we ensure 100% quality.

You have received a new sms

Last Updated: 29-07-2018

Open API System: We have very powerful Web API which can be integrated with any software/web application. Read More: https://bdbulksms.net/bd-bulk-sms-api.html

Easy Recharging: You can load balance on your account anytime using Bkash/Rocket/Dutch Bangla Bank/Trust Bank

Maximum Security: We have professional security expert to ensure database and server security. We also give reward if anyone finds bugs on our system.

We do not sell your data: You may find many companies offering databases (area wise, category wise) for sending SMS. We do not offer such thing. Selling data (numbers and others info) is a bad manner of a company. Company should not sell user's number as it is a personal stuff. If they can sell other's data for the money they can sell your data to others for the money.

Own control panel with reporting: We have very powerful control panel with inbox, delivery report, SMS history, invoice and lots of useful features. Our control panel is fully responsive thus can be used on any mobile, tab, desktop.

Dynamic SMS From Excel: You can easily upload excel sheet and send dynamic sms from excel.

Auto Reply: If someone whom you send SMS earlier send a reply it can be forwarded to your email and mobile number. This is a unique feature of our SMS service. You can set auto reply like this, "Thank you for sending reply. Soon we will contact with you." or your own message.

Data Encryption: We use OPEN SSL and different unique key for each user to encrypt the data. Nobody can decrypt the data except you and your control panel.

SMS Control Panel

We request you to check our control panel by opening an account from the below web link

https://sms.greenweb.com.bd

You will get 10 SMS Free to test our service.
